550 East Farnance Street  
Norristown, Pennsylvania 19401-3561  
(610) 272-5600

### A FAMILY SAFETY GUIDE

**At Regina Nursing Center we would like to reduce the risk of falls or injury and limit the use of restraints. By so doing, we believe our residents will achieve greater independence, as well as preserve their dignity, while decreasing the risk of injury related to falls.**

**Each resident will be checked often to determine his or her level of risk of falling. At Care Conference, every three months, our interdisciplinary team will assess the risk of fall and restraint needs.**

**To assist us in implementing the above, we ask that you follow these safety guidelines:**

**When visiting, tell a staff member when you are leaving.**

**For all of our residents, make sure that the call light, telephone, tissues and water are within reach.**

**Help us keep a safe environment by removing clutter and notify staff of any spills or other concerns you may have.**

**We appreciate your cooperation with our policies and encourage you to communicate any concerns you may have regarding your loved ones needs to our staff.**

**Thank You.**
